

Z5 Features

Introducing Zempat5

Built with growers in mind, the Zempat5 (Z5) offers unparalleled features for any panel that exists. Z5 is the first in class, full color 5" capacitive touch screen computer panel. Unlike other manufacturers' computer panels with soft touch buttons, the Z5 won't wear out. It has an easy swipe format with a modern look. Replacing your main panel is a thing of the past. Retro-fit any existing panel with the Z5 and take control today!

Why Z5?

The Z5 utilizes your existing main panel saving time and money. It replaces your existing percent timer, while keeping the rest of your panel intact. It also offers features unmatched by any other brand, including SMART START. Combined with the FieldWise Portal, the Z5 creates the most enhanced experience that money can buy.

Cutting Edge Technology

- 5" full-color capacitive touch screen
- Smart Start
- Smart Touch Menu Navigation
- Over Current Protection
- Easy to understand Fault messages
- Easy swipe format
- Private In-Field Network
- Built-in remote capability
- Intuitive user interface

 The heartbeat of your pivot is your safety circuit. With the Z5's SMART START, your safety circuit is being checked at start-up and while your pivot is running.

Why is this important?

The Z5 is verifying the safety circuit is free of a short that may occur at any tower box or main panel. This will allow your pivot to stop if there is a fault.
